

Instagram Content Strategy Recommendation

Objective

The objective of this strategy is to improve Instagram engagement by analyzing previous post performance and recommending an optimized posting plan based on data insights.

Key Findings

1. Best Content Type

- Photo posts achieved the highest average engagement (**63.63**).
- Video posts followed closely (**63.08**).
- Carousel posts had slightly lower engagement (**62.54**).

Recommendation:

Focus primarily on photo posts while maintaining a balance with videos and carousels.

2. Posting Time

The dataset shows that all posts were published at **8:00 AM**.

Recommendation:

Continue posting around **8 AM**, but conduct A/B testing with additional posting times (10 AM, 2 PM, 6 PM, and 8 PM) to determine the true optimal posting schedule.

3. Posting Day

All posts in the dataset were published on **Thursday**.

Recommendation:

Expand posting across different weekdays to identify which day generates the highest audience engagement.

4. High-Performing Hashtags

The most engaging hashtags include:

- delicious
- beauty

- foodie
- sunset
- stunning
- food
- photography
- dreamy
- smile
- party

Recommendation:

Use these hashtags more frequently in future posts while mixing them with trending hashtags relevant to the content.

5. Popular Hashtags

Frequently used hashtags include:

- smile
- beach
- party
- fun
- concert
- food
- lol
- hair
- happy
- beauty

Recommendation:

Combine highly popular hashtags with high-performing hashtags to maximize both reach and engagement.

6. Top Performing Posts

The highest-performing post achieved **79 total engagements**, while the remaining top posts scored between **72 and 75**.

Recommendation:

Analyze the content, captions, visuals, and hashtags used in these top-performing posts and replicate similar strategies in future campaigns.

Recommended Weekly Posting Plan

Day	Time	Content Type	Focus
Monday	8:00 AM	Photo	Product/Brand Awareness
Tuesday	8:00 AM	Video	Behind-the-scenes
Wednesday	8:00 AM	Photo	Customer Story
Thursday	8:00 AM	Carousel	Educational Content
Friday	8:00 AM	Photo	Promotions/Offers
Saturday	8:00 AM	Video	Entertainment/Reels
Sunday	8:00 AM	Photo	Community Engagement

Expected Benefits

Implementing this strategy is expected to:

- Increase likes and comments.
- Improve audience engagement.
- Enhance content visibility.
- Optimize hashtag performance.
- Support data-driven marketing decisions.

Conclusion

The exploratory data analysis indicates that **photo posts generated the highest engagement**, while several hashtags consistently performed well. Although the current dataset contains posts from only one posting time and one weekday, the analysis provides a strong foundation for improving Instagram marketing strategies. Future experiments involving different posting times and weekdays will help further optimize content performance.
